CRISP **WOOD**co.

PRODUCT DATA SHEET

Western Hemlock

Clear vertical grain Western Hemlock with a refined surface, for exterior soffits, interior walls and ceilings.

Specification

Species	Western Hemlock
Grade	Clear vertical grain
Texture	Refined
Profiles	1/8 in gap fine line, S4S (smooth four sides)
Sizes	1×4, 1×5, 1×6, 1×8, 1×10
Lengths	3 to 20 ft
Applications	Exterior soffits, interior walls and ceilings. Not for exterior cladding.
Coating	Premium waterborne multi-coat system, factory applied, sealed on all four sides
Colours	Aero, Origin, Scandinave, Haze, Lumen, Drift, Umbra, Silica (8)

Characteristics

- **Light and uniform.** Pale, consistent colour and a clear vertical grain give a calm, even surface across the whole ceiling.
- **Strong, stiff, light.** Strength and stiffness suited to long horizontal spans, in a wood that is easy to handle overhead.
- **Takes colour evenly.** A non-resinous wood that accepts colour evenly from board to board.
- **Inside and out.** The same boards and colours carry from interior ceilings straight through to exterior soffits.

Supply

- Delivered complete, sealed on all four sides and ready to install.
- Lead time is approximately two weeks from date of confirmation.
- Every order ships with one gallon of matched touch-up.
- Custom orders in other species, profiles and sizes are also available.

Installation

- Install to the Crisp Wood Co. Installation Manual, over a weather barrier on furring strips (ventilated rainscreen).
- Stainless steel fasteners. Nails to penetrate at least 1.25 in into solid wood.
- Seal all field cuts before installation.

Warranty and care

15-year limited warranty, kept in effect by the Crisp maintenance program: wash every year; re-seal siding, soffits, fascia and trim every five years with a Crisp-approved sealer; keep records. Full terms at crispwoodco.com/warranty.

Samples and support
